Subject: Microsoft Settlement

Please put the Microsoft case to rest and approve the pending settlement. As a technology professional I have a great appreciation for the innovation and quality represented by Microsoft's software and don't want to see them impaired by intrusive government action-- action pushed by competitors who seek unfair advantage for their inferior products. I don't work for Microsoft nor have any ties to them. I simply want the best tools to allow me to do my job and I believe that Microsoft provides them.
